

2010 Mathematics Subject Classification index

Volume 5, 2018

- 26A51** H. Budak, M.Z. Sarikaya, On generalized stochastic fractional integrals and related inequalities, [471](#)
- 26D15** H. Budak, M.Z. Sarikaya, On generalized stochastic fractional integrals and related inequalities, [471](#)
- 34A08** M. D’Ovidio, F. Iafate, E. Orsingher, Drifted Brownian motions governed by fractional tempered derivatives, [445](#)
- 34G20** L. Shaikhet, Multi-condition of stability for nonlinear stochastic non-autonomous delay differential equation, [337](#)
- 34K20** L. Shaikhet, Multi-condition of stability for nonlinear stochastic non-autonomous delay differential equation, [337](#)
- 34K50** L. Shaikhet, Multi-condition of stability for nonlinear stochastic non-autonomous delay differential equation, [337](#)
- 40A05** A.V. Ivanov, I.V. Orlovskiy, Large deviations of regression parameter estimator in continuous-time models with sub-Gaussian noise, [191](#)
- 46A40** H. Gessesse, A. Melnikov, Martingale-like sequences in Banach lattices, [501](#)
- 46B42** H. Gessesse, A. Melnikov, Martingale-like sequences in Banach lattices, [501](#)
- 60E10** B. Böttcher, M. Keller-Ressel, R.L. Schilling, Detecting independence of random vectors: generalized distance covariance and Gaussian covariance, [353](#)
- 60E15** D. Kievinaitė, J. Šiaulys, Exponential bounds for the tail probability of the supremum of an inhomogeneous random walk, [129](#)

- 60F05** V. Čekanavičius, P. Vellaisamy, On closeness of two discrete weighted sums, [207](#)
M.M. Ljungdahl, M. Podolskij, A limit theorem for a class of stationary increments Lévy moving average process with multiple singularities, [297](#)
- 60F10** B. Pacchiarotti, A. Pigliacelli, Large deviations for conditionally Gaussian processes: estimates of level crossing probability, [483](#)
- 60F15** M.M. Ljungdahl, M. Podolskij, A limit theorem for a class of stationary increments Lévy moving average process with multiple singularities, [297](#)
- 60G07** B. Pacchiarotti, A. Pigliacelli, Large deviations for conditionally Gaussian processes: estimates of level crossing probability, [483](#)
- 60G10** M. Hess, Cliquet option pricing in a jump-diffusion Lévy model, [317](#)
- 60G15** A.V. Ivanov, I.V. Orlovskiy, Large deviations of regression parameter estimator in continuous-time models with sub-Gaussian noise, [191](#)
B. Böttcher, M. Keller-Ressel, R.L. Schilling, Detecting independence of random vectors: generalized distance covariance and Gaussian covariance, [353](#)
F. Cordero, I. Klein, L. Perez-Ostafe, Asymptotic arbitrage in fractional mixed markets, [415](#)
B. Pacchiarotti, A. Pigliacelli, Large deviations for conditionally Gaussian processes: estimates of level crossing probability, [483](#)
- 60G22** M.M. Ljungdahl, M. Podolskij, A limit theorem for a class of stationary increments Lévy moving average process with multiple singularities, [297](#)
F. Cordero, I. Klein, L. Perez-Ostafe, Asymptotic arbitrage in fractional mixed markets, [415](#)
- 60G48** M.M. Ljungdahl, M. Podolskij, A limit theorem for a class of stationary increments Lévy moving average process with multiple singularities, [297](#)
H. Gessesse, A. Melnikov, Martingale-like sequences in Banach lattices, [501](#)
- 60G50** D. Kievinaitė, J. Šiaulyš, Exponential bounds for the tail probability of the supremum of an inhomogeneous random walk, [129](#)
K. Buchak, L. Sakhno, Properties of Poisson processes directed by compound Poisson-Gamma subordinators, [167](#)
A.V. Ivanov, I.V. Orlovskiy, Large deviations of regression parameter estimator in continuous-time models with sub-Gaussian noise, [191](#)
- 60G51** M. Hess, Cliquet option pricing with Meixner processes, [81](#)
K. Buchak, L. Sakhno, Properties of Poisson processes directed by compound Poisson-Gamma subordinators, [167](#)
M. Hess, Cliquet option pricing in a jump-diffusion Lévy model, [317](#)
- 60G55** K. Buchak, L. Sakhno, Properties of Poisson processes directed by compound Poisson-Gamma subordinators, [167](#)
L. Shaikhet, Multi-condition of stability for nonlinear stochastic non-autonomous delay differential equation, [337](#)

- 60G57** V. Radchenko, N. Stefans'ka, Approximation of solutions of the stochastic wave equation by using the Fourier series, [429](#)
- 60G99** H. Budak, M.Z. Sarikaya, On generalized stochastic fractional integrals and related inequalities, [471](#)
- 60H05** M.M. Ljungdahl, M. Podolskij, A limit theorem for a class of stationary increments Lévy moving average process with multiple singularities, [297](#)
- 60H10** M. Hess, Cliquet option pricing with Meixner processes, [81](#)
M. Hess, Cliquet option pricing in a jump-diffusion Lévy model, [317](#)
- 60H15** V. Radchenko, N. Stefans'ka, Approximation of solutions of the stochastic wave equation by using the Fourier series, [429](#)
- 60H30** M. Hess, Cliquet option pricing with Meixner processes, [81](#)
- 60J10** V. Čekanavičius, P. Vellaisamy, On closeness of two discrete weighted sums, [207](#)
- 60J65** M. D'Ovidio, F. Iafrate, E. Orsingher, Drifted Brownian motions governed by fractional tempered derivatives, [445](#)
- 62E20** D. Kievinaitė, J. Šiaulyš, Exponential bounds for the tail probability of the supremum of an inhomogeneous random walk, [129](#)
- 62F07** D. Källberg, Y. Belyaev, P. Rydén, A moment-distance hybrid method for estimating a mixture of two symmetric densities, [1](#)
- 62F10** D. Källberg, Y. Belyaev, P. Rydén, A moment-distance hybrid method for estimating a mixture of two symmetric densities, [1](#)
- 62F35** D. Källberg, Y. Belyaev, P. Rydén, A moment-distance hybrid method for estimating a mixture of two symmetric densities, [1](#)
- 62G20** V. Miroshnichenko, R. Maiboroda, Confidence ellipsoids for regression coefficients by observations from a mixture, [225](#)
B. Böttcher, M. Keller-Ressel, R.L. Schilling, Detecting independence of random vectors: generalized distance covariance and Gaussian covariance, [353](#)
- 62H12** S.V. Shklyar, Consistency of the total least squares estimator in the linear errors-in-variables regression, [247](#)
- 62H20** B. Böttcher, M. Keller-Ressel, R.L. Schilling, Detecting independence of random vectors: generalized distance covariance and Gaussian covariance, [353](#)
- 62J05** V. Miroshnichenko, R. Maiboroda, Confidence ellipsoids for regression coefficients by observations from a mixture, [225](#)
S.V. Shklyar, Consistency of the total least squares estimator in the linear errors-in-variables regression, [247](#)

- 62P10** D. Källberg, Y. Belyaev, P. Rydén, A moment-distance hybrid method for estimating a mixture of two symmetric densities, [1](#)
- 65B10** A.V. Ivanov, I.V. Orlovskiy, Large deviations of regression parameter estimator in continuous-time models with sub-Gaussian noise, [191](#)
- 91B24** F. Cordero, I. Klein, L. Perez-Ostafe, Asymptotic arbitrage in fractional mixed markets, [415](#)
- 91B26** F. Cordero, I. Klein, L. Perez-Ostafe, Asymptotic arbitrage in fractional mixed markets, [415](#)
- 91B30** M. Hess, Cliquet option pricing with Meixner processes, [81](#)
D. Kievinaitė, J. Šiaulyš, Exponential bounds for the tail probability of the supremum of an inhomogeneous random walk, [129](#)
M. Hess, Cliquet option pricing in a jump-diffusion Lévy model, [317](#)
- 91B70** M. Hess, Cliquet option pricing with Meixner processes, [81](#)
M. Hess, Cliquet option pricing in a jump-diffusion Lévy model, [317](#)
- 92D10** D. Källberg, Y. Belyaev, P. Rydén, A moment-distance hybrid method for estimating a mixture of two symmetric densities, [1](#)
