

2010 Mathematics Subject Classification index

Volume 6, 2019

- 05C80** I. Fazekas, Cs. Noszály, N. Uzonyi, Taylor's power law for the N -stars network evolution model, [311](#)
- 11B73** P. Mayster, A. Tchorbadjieff, Logarithmic Lévy process directed by Poisson subordinator, [419](#)
- 33C05** P. Mayster, A. Tchorbadjieff, Logarithmic Lévy process directed by Poisson subordinator, [419](#)
- 35A08** M. Zili, E. Zougar, Spatial quadratic variations for the solution to a stochastic partial differential equation with elliptic divergence form operator, [345](#)
- 35K55** K. Ralchenko, G. Shevchenko, Existence and uniqueness of mild solution to fractional stochastic heat equation, [57](#)
- 35R60** K. Ralchenko, G. Shevchenko, Existence and uniqueness of mild solution to fractional stochastic heat equation, [57](#)
- 50G46** P. Di Tella, H.-J. Engelbert, BSDEs and log-utility maximization for Lévy processes, [479](#)
- 6008** R.V. Ivanov, K. Ano, Option pricing in time-changed Lévy models with compound Poisson jumps, [81](#)
- 60A05** M. Vidmar, Arithmetic of (independent) sigma-fields on probability spaces, [269](#)
- 60A10** M. Vidmar, Arithmetic of (independent) sigma-fields on probability spaces, [269](#)

- 60E07** P. Mayster, A. Tchobadjieff, Logarithmic Lévy process directed by Poisson subordinator, [419](#)
- 60F05** R. Belfadli, L. Boulanba, M. Mellouk, Moderate deviations for a stochastic Burgers equation, [167](#)
D. Giraud, Convergence rates in the central limit theorem for weighted sums of Bernoulli random fields, [251](#)
- 60F10** R. Belfadli, L. Boulanba, M. Mellouk, Moderate deviations for a stochastic Burgers equation, [167](#)
- 60G10** M. Voutilainen, L. Viitasaari, P. Ilmonen, Note on AR(1)-characterisation of stationary processes and model fitting, [195](#)
A. Buteikis, R. Leipus, A copula-based bivariate integer-valued autoregressive process with application, [227](#)
- 60G15** M. Zili, E. Zougar, Spatial quadratic variations for the solution to a stochastic partial differential equation with elliptic divergence form operator, [345](#)
Z. Mahdi Khalil, C. Tudor, Estimation of the drift parameter for the fractional stochastic heat equation via power variation, [397](#)
- 60G18** Z. Mahdi Khalil, C. Tudor, Estimation of the drift parameter for the fractional stochastic heat equation via power variation, [397](#)
- 60G22** K. Ralchenko, G. Shevchenko, Existence and uniqueness of mild solution to fractional stochastic heat equation, [57](#)
S. Lohvinenko, K. Ralchenko, Maximum likelihood estimation in the non-ergodic fractional Vasicek model, [377](#)
- 60G44** R.V. Ivanov, K. Ano, Option pricing in time-changed Lévy models with compound Poisson jumps, [81](#)
- 60G51** R.V. Ivanov, K. Ano, Option pricing in time-changed Lévy models with compound Poisson jumps, [81](#)
O. Ragulina, The risk model with stochastic premiums and a multi-layer dividend strategy, [285](#)
P. Di Tella, H.-J. Engelbert, BSDEs and log-utility maximization for Lévy processes, [479](#)
- 60G60** D. Giraud, Convergence rates in the central limit theorem for weighted sums of Bernoulli random fields, [251](#)
- 60H05** M. Zili, E. Zougar, Spatial quadratic variations for the solution to a stochastic partial differential equation with elliptic divergence form operator, [345](#)
Z. Mahdi Khalil, C. Tudor, Estimation of the drift parameter for the fractional stochastic heat equation via power variation, [397](#)
P. Di Tella, H.-J. Engelbert, BSDEs and log-utility maximization for Lévy processes, [479](#)
- 60H07** T. Huschto, M. Podolskij, S. Sager, The asymptotic error of chaos expansion approximations for stochastic differential equations, [145](#)

- 60H10** T. Huschto, M. Podolskij, S. Sager, The asymptotic error of chaos expansion approximations for stochastic differential equations, [145](#)
- 60H15** K. Ralchenko, G. Shevchenko, Existence and uniqueness of mild solution to fractional stochastic heat equation, [57](#)
R. Belfadli, L. Boulanba, M. Mellouk, Moderate deviations for a stochastic Burgers equation, [167](#)
M. Zili, E. Zougar, Spatial quadratic variations for the solution to a stochastic partial differential equation with elliptic divergence form operator, [345](#)
- 60H30** R.V. Ivanov, K. Ano, Option pricing in time-changed Lévy models with compound Poisson jumps, [81](#)
- 60J10** G. Liaudanskaitė, V. Čekanavičius, Asymptotics for the sum of three state Markov dependent random variables, [109](#)
V. Golomoziy, On estimation of expectation of simultaneous renewal time of time-inhomogeneous Markov chains using dominating sequence, [333](#)
- 60J75** R.V. Ivanov, K. Ano, Option pricing in time-changed Lévy models with compound Poisson jumps, [81](#)
P. Mayster, A. Tchobadjieff, Logarithmic Lévy process directed by Poisson subordinator, [419](#)
- 60K05** V. Golomoziy, On estimation of expectation of simultaneous renewal time of time-inhomogeneous Markov chains using dominating sequence, [333](#)
- 60K35** L. Angelani, R. Garra, Probability distributions for the run-and-tumble models with variable speed and tumbling rate, [3](#)
- 60K99** L. Angelani, R. Garra, Probability distributions for the run-and-tumble models with variable speed and tumbling rate, [3](#)
- 62E10** I. Fazekas, Cs. Noszály, N. Uzonyi, Taylor's power law for the N -stars network evolution model, [311](#)
- 62E20** V. Bagdonavičius, R. Levulienė, Testing proportional hazards for specified covariates, [209](#)
- 62F10** S. Lohvinenko, K. Ralchenko, Maximum likelihood estimation in the non-ergodic fractional Vasicek model, [377](#)
- 62F12** S. Lohvinenko, K. Ralchenko, Maximum likelihood estimation in the non-ergodic fractional Vasicek model, [377](#)
- 62G20** R. Maiboroda, O. Sugakova, Jackknife covariance matrix estimation for observations from mixture, [495](#)
- 62H12** A. Buteikis, R. Leipus, A copula-based bivariate integer-valued autoregressive process with application, [227](#)
- 62J05** R. Maiboroda, O. Sugakova, Jackknife covariance matrix estimation for observations from mixture, [495](#)

- 62M10** M. Voutilainen, L. Viitasaari, P. Ilmonen, Note on AR(1)-characterisation of stationary processes and model fitting, [195](#)
A. Buteikis, R. Leipus, A copula-based bivariate integer-valued autoregressive process with application, [227](#)
- 62N01** V. Bagdonavičius, R. Levulienė, Testing proportional hazards for specified covariates, [209](#)
- 62N02** V. Bagdonavičius, R. Levulienė, Testing proportional hazards for specified covariates, [209](#)
- 62N03** V. Bagdonavičius, R. Levulienė, Testing proportional hazards for specified covariates, [209](#)
- 65C30** T. Huschto, M. Podolskij, S. Sager, The asymptotic error of chaos expansion approximations for stochastic differential equations, [145](#)
- 91B30** O. Navickienė, J. Sprindys, J. Šiaulys, Ruin probability for the bi-seasonal discrete time risk model with dependent claims, [133](#)
O. Ragulina, The risk model with stochastic premiums and a multi-layer dividend strategy, [285](#)
- 91B70** O. Navickienė, J. Sprindys, J. Šiaulys, Ruin probability for the bi-seasonal discrete time risk model with dependent claims, [133](#)
