

Subject index

Volume 6, 2019

A

Absorbing state 110, 111, 114
Actuarial schema 334
Almost sure central limit theorem
(ASCLT) 347, 350, 351, 353, 356,
357, 359
Arbitrage opportunities 487
Autocovariance functions 197
Autoregressive moving average 195,
196

B

Bernoulli random field 252–255, 257,
258
Bernstein function 420, 421, 425,
430–433, 436, 437
Beta function 64
Bifractional Brownian motion 399, 400,
404, 408, 409, 411, 413
Bilateral gamma processes 82
BINAR 228–234, 237, 238, 241,
243–245
BINAR models for loan data 245
Bivariate copulas 231, 232
Bivariate INAR 229
Bivariate MGF 381
Bivariate Poisson distribution 138
Bondora issues loans 241

Boundedness 169, 176, 180, 191
Bounds 63, 73, 74, 77
Brownian sheet 168, 170, 171, 173
BSDEs 479, 480
BSDEs for Lévy processes 482

C

Censoring 211, 213
Censoring time 211
Central limit theorem 169, 183
Chaos expansion 146, 150, 156
Characterisation 196, 205
Characteristic triplet 481, 482
CIR process 13, 14
Clayton copula 138–141, 233, 238, 243
CLS estimates 238, 240, 241, 243
CLS estimators 233–235, 238
Compound Poisson approximation 111
Compound Poisson distribution 112,
119
Compound Poisson processes 83, 286
Conditional independence 278–281
Conditional least squares (CLS) 233
Conditional maximum likelihood (CML)
237
Confidence intervals 504, 506
Confidence sets for regression
coefficients 504

Consecutive subordinations 420
 Copulas 228, 231–233, 236, 243–245
 definition 231
 dependence parameter 233, 245
 functions 241
 in BINAR models 228
 theory 232
 Cox model 212, 214, 218, 220, 223
 Cumulative hazard functions 210

D

Daley inequality 334
 Defaulted loan data 244
 Defaulted loans 241, 243, 244
 Degree distribution 42, 47
 Deviation scale 168, 169
 Diffuse 271, 275, 277, 278
 Dirichlet boundary conditions 168, 170, 174, 183
 Discrete time risk model 133–136, 142
 Distributivity 271, 273, 275, 279–281
 Dividend
 payments 286–288, 292, 293, 302, 304, 305
 strategies 286
 Dominating sequence 336–339, 341

E

Euler approximation scheme 146
 Euler approximations 32, 34
 Explosive autoregressive models 389
 Exponential generating function 422, 428, 429, 432, 434
 External Independent Testing (EIT) 505

F

FGM copula 232, 236, 243–245
 Finite Mixture Models (FMM) 495
 Fractional
 Brownian motion 1, 14–17, 24, 34, 35, 58, 60, 68, 196, 206, 377, 379, 380, 398–401, 404, 408, 410–412, 414, 416
 Laplacian 397–399, 408, 409, 416
 stochastic heat equation 397, 399, 416

Fractional Brownian process 58, 60, 61
 Fractional CIR process 15, 16
 Fractional noise 57, 58
 Fractional Vasicek model 377, 379, 389
 Frank copula 228, 231, 233, 239, 243–245
 Fundamental solution 347, 348, 353, 358, 365, 373

G

Gamma process 85, 86
 Gamma subordinator 430, 431, 440
 Gaussian martingale 380
 Gaussian noise 397, 398, 409, 411, 416
 Gaussian process 347, 348, 351, 353, 400, 401, 403, 405, 408, 411
 Gaussian property 62, 65, 67, 69, 73, 76
 Gaussian random variable 456, 462, 472
 Gerber–Shiu function 285–288
 GINAR 235
 Globally Lipschitz 168, 174, 175, 178, 183, 185
 Ground process 421, 429, 431, 435

H

Haar basis 153, 159, 160
 Hannan type condition 255
 Hazard functions 210
 Hazard rates 210, 211
 Heat equation 398–400, 408, 416
 Helicoidal filaments 3
 Homogeneous Poisson process 43–45
 Hurst index 1, 16, 24, 377, 380
 Hurst parameters 400, 409

I

INAR(1) 206, 229, 233, 234
 Incarceration 223
 Independent
 complements 271
 conditioning 272
 equiprobable signs 270, 273, 276, 279, 281
 Independent random censoring 211
 Infinite velocity 5

- Infinitely divisible characteristic functions 452, 472
- Infinitely divisible distributions 420
- Infinitely divisible logarithmic series 419–421, 423, 425, 427
- Infinitely divisible random measure 446, 447, 450
- Innovations 228, 231, 232, 243, 244, 247
- Insurance models 1, 109, 110, 112, 114
- Inversion formula 126–128
- Isometry 349–351, 354, 399, 448, 458, 473, 474, 482
- Isonormal Gaussian process 351
- Isotropic fBm 410
- Issuing loans 228

- J**
- Jackknife 496, 499
 - ACM estimators 501
 - estimates 496
 - estimation 499
 - estimator 496, 499, 500
 - technique 495, 502, 512
- Joint MGF 382

- K**
- Kolmogorov 352, 355, 359

- L**
- Laplace principle 169, 171–173
- Lévy
 - characteristic 446, 448
 - density 443, 444, 446, 448, 451
 - process 443, 444
- Lévy measure 420, 421, 425, 426, 428–431, 433, 434, 436, 437, 439
- Lévy process 419–421, 425–427, 429, 430, 433, 440, 479–483, 486
- Linear growth 60, 65
- Linear growth conditions 16, 152, 154
- Linear regression coefficients 496
- Linear span 348, 351, 353
- Lipschitz continuity 60, 65, 69, 70
- Liquidity 196, 206
- Loans 227, 228, 241–243
 - defaulted 228
 - non-defaulted 228
- Loans data 241, 245
- Loans rating system 241, 242
- Logarithmic series 420, 421, 430
- Logarithmic utility maximization 480, 486

- M**
- Macroevolution 41, 51
- Main stochastic term 458, 461, 462
- Malliavin calculus 146, 147, 152
- Malliavin derivative 148, 149, 153, 154
- Marginal 138, 140, 141
- Marginal distribution 46, 135, 138–140, 228, 231, 232, 235, 237–239, 243–245, 247, 313, 316, 318, 320
- Marginal distribution functions 228
- Marine bacteria 4
- Markov binomial distribution 111
- Markov chain 109–111
- Markov chains 334, 335, 342
- Martingale convergence 271, 272, 274, 280, 281
- Martingale optimality principle 480, 488, 491, 493
- Martingales 390, 391
- Maximum likelihood estimator (MLE) 378, 380, 389
- Mild solution 58, 59, 61–63, 73, 347–351, 353, 359, 373, 398, 400, 409, 416
- Minimal cost functions 169
- Moderate deviations 167–169, 171, 173, 192, 193
- Moment generating functions (MGF) 378
- Motile bacteria 3
- Multiplicative intensities 211
- Mutually independent 83, 86, 92
- MVC model 496

- N**
- Natural topology 26, 29
- Negative binomial 235, 237, 243–245

- Negative binomial distribution 231, 235, 239, 240, 243–245, 247
- Negative binomial marginal distribution 231, 244
- Negative dependence 138, 139
- Net profit condition 288, 291, 295, 297, 298, 302, 303
- Normalised probability convolution distribution 428, 432, 434
- Numerical maximization 238–240
- O**
- Obscure structure 15, 33
- Older loans 241
- Orthogonalized Teugels martingales 480
- Orthonormal basis 146, 147, 153
- OS property 45
- P**
- Pairwise independent 270, 275, 280
- Parabolic Green's function 58, 61, 62
- Parabolic SPDEs 57, 183
- Parameter estimation 378
- Partial Bell polynomials 420, 422, 425, 427, 428
- Partial differential equations (PDE) 345, 346
- Pathwise Riemann integral 37
- Pathwise stochastic integration 61
- Pathwise Stratonovich integral 14, 15, 35, 37, 38
- Periodic chains 336
- Peripheral
 vertex 313–315
 weight 313, 315, 316, 318, 327
- Persistent random walk 4, 5, 7–9
- Perturbed fBm 400, 405–407, 414
- Pointwise limit 15, 17, 22, 33
- Poisson 138–141
- Poisson innovations 236
- Poisson marginals 139
- Poisson processes 83, 88, 93
- Polynomial chaos expansions 159, 160
- Power law 311–313, 316, 318, 329
- Power variations 379, 380, 398, 416
- Prabhakar function 43, 50
- Predictable
 compensator 490
 function 481, 491
 process 486–488, 490, 492
- Predictable increasing process 481
- Predictable representation property 479
- Predictable square variation 481
- Predictable variation 215, 216, 218
- Preferential attachment 41, 42, 312, 314
- Preferential attachment random graph 42
- Price process 487, 490, 491
- Probability generating function 44
- Product copula 232
- Propagator system 150, 151, 161
- Proportional hazards (PH) 209, 210
- Q**
- QL estimators 206
- QL methods 206
- R**
- Random
 field 252–255, 258, 262, 443, 444, 447, 449, 450, 455, 457, 461, 464, 476
 graphs 42
 intensities 47
 measure 443, 446, 454
 motion 7
 times 41
 variable 44–47, 49, 50, 52, 251, 252, 254, 255, 260, 262
 walk 5, 7, 8
 walker 6
- Random processes 17, 34, 35
- Regression coefficients 496, 501, 504, 507
- Regression data 209, 211
- Regression model 252, 257
- Regularly growing 444–446, 455, 456, 462, 463, 472, 476
- Remainder term 458, 464
- Renewal
 proceses 334

sequences 333–335, 341
 times 335, 336, 339
 trials 337, 338
 Reorientation frequency 4, 10
 Residential treatment 223
 Residential treatment for drug abuse
 223
 Reversed triangular inequality 263
 Riemann integrable 22, 29
 Riesz kernel 398, 408, 409
 Risk models 285–287
 Risky assets 88, 95
 Ruin probability 134, 138, 140–142,
 285–287, 291, 295, 299, 304, 305
S
 Signed compound Poisson measure 114
 Signed Stirling numbers 426, 429
 Skorokhod definition 61
 Sparse truncation 159, 161
 SPDEs 168, 173, 174, 191
 Stability estimates 334, 342
 Stable subordinator 43, 46, 47
 Standard CIR model 14
 Standard Laplacian 398, 408, 416
 Stationary probability distribution 7, 8
 Stationary processes 195, 197, 198, 206
 Stirling numbers 420, 423, 424, 435,
 436
 Stochastic Burgers equation 168, 169,
 174, 183
 Stochastic heat equation 346, 347, 350,
 358, 359, 398, 399, 408, 409
 Stochastic heat equation fractional 397,
 399, 416
 Stochastic integral 352, 353, 481, 487,
 490
 Stochastic partial differential equation
 (SPDE) 346, 347, 358, 372
 Stochastic premiums 286, 287
 Subgeometrical Markov chains 334
 Subordinated Lévy process 433
 Subordinated process 420, 421,
 429–431, 433, 437, 440
 Subordination 420, 429, 431, 434, 440

Subordinators 86, 88, 90, 94
 Surplus process 287, 288, 292, 296, 302
 Survival probability 135

T

Telegraph equation 4–6
 Telegraph process 4, 5
 Teugels martingales 480, 483
 TfPp 43, 44, 46, 47
 Thinning operator 229, 230
 Tightness 169, 174–177, 179
 Transition probability 110–112, 420,
 421, 425–431, 433, 435
 Trigonometric basis 147, 153, 159
 Tumbling rate 4, 9, 10

U

Ultimate ruin probability 1, 134
 Unconditional probability distribution 7

V

Variational solution 58
 Velocity 4–9
 Velocity random motion 5
 Vertex 312–315, 318
 Vertex peripheral 313–315

W

Wasserstein 352, 355, 359
 Wasserstein distance 398, 400, 402,
 411, 416
 Weak convergence 169, 171, 172, 191
 Weak topology 172, 174, 181
 Wealth process 488–491
 Wiener 349, 350
 integral 348, 373, 399, 409, 410
 Wiener chaos 146, 147, 153, 351, 352
 Wiener chaos expansion 146–149, 151
 Wiener process 83, 346

Y

Yule model 1, 41, 42, 46, 47
 Yule process 42, 45, 46

Z

Zeta distribution 141
