### Volume 7, 2020

- 11B73** A. Tchobadjieff, P. Mayster, [Geometric branching reproduction Markov processes](#), 357
- 28A35** N.D. Macheras, S.M. Tzaninis, [A characterization of equivalent martingale measures in a renewal risk model with applications to premium calculation principles](#), 43
- 33C05** A. Tchobadjieff, P. Mayster, [Geometric branching reproduction Markov processes](#), 357
- 35G10** Yu. Kozachenko, E. Orsingher, L. Sakhno, O. Vasylyk, [Estimates for distribution of suprema of solutions to higher-order partial differential equations with random initial conditions](#), 79
- 35K10** H. Knani, M. Dozzi, [Linear backward stochastic differential equations with Gaussian Volterra processes](#), 415
- 35R60** Yu. Kozachenko, E. Orsingher, L. Sakhno, O. Vasylyk, [Estimates for distribution of suprema of solutions to higher-order partial differential equations with random initial conditions](#), 79
- 60A10** N.D. Macheras, S.M. Tzaninis, [A characterization of equivalent martingale measures in a renewal risk model with applications to premium calculation principles](#), 43
- 60E07** A. Basse-O'Connor, J. Pedersen, V. Rohde, [On infinite divisibility of a class of two-dimensional vectors in the second Wiener chaos](#), 267
- 60F10** B. Pacchiarotti, [Pathwise asymptotics for Volterra processes conditioned to a noisy version of the Brownian motion](#), 17

- 60F15** A.V. Marynych, I.K. Matsak, [The laws of iterated and triple logarithms for extreme values of regenerative processes](#), 61
- 60G07** A. De Gregorio, R. Garra, [Alternative probabilistic representations of Barenblatt-type solutions](#), 97  
A.A. Gushchin, [Single jump filtrations and local martingales](#), 135
- 60G15** B. Pacchiarotti, [Pathwise asymptotics for Volterra processes conditioned to a noisy version of the Brownian motion](#), 17  
A. Basse-O'Connor, J. Pedersen, V. Rohde, [On infinite divisibility of a class of two-dimensional vectors in the second Wiener chaos](#), 267
- 60G20** Yu. Kozachenko, E. Orsingher, L. Sakhno, O. Vasylyk, [Estimates for distribution of suprema of solutions to higher-order partial differential equations with random initial conditions](#), 79
- 60G22** B. Pacchiarotti, [Pathwise asymptotics for Volterra processes conditioned to a noisy version of the Brownian motion](#), 17  
O. Banna, F. Buryak, Yu. Mishura, [Distance from fractional Brownian motion with associated Hurst index  \$0 < H < 1/2\$  to the subspaces of Gaussian martingales involving power integrands with an arbitrary positive exponent](#), 191  
D. Avetisian, K. Ralchenko, [Ergodic properties of the solution to a fractional stochastic heat equation, with an application to diffusion parameter estimation](#), 339  
H. Knani, M. Dozzi, [Linear backward stochastic differential equations with Gaussian Volterra processes](#), 415
- 60G44** N.D. Macheras, S.M. Tzaninis, [A characterization of equivalent martingale measures in a renewal risk model with applications to premium calculation principles](#), 43  
A.A. Gushchin, [Single jump filtrations and local martingales](#), 135  
O. Banna, F. Buryak, Yu. Mishura, [Distance from fractional Brownian motion with associated Hurst index  \$0 < H < 1/2\$  to the subspaces of Gaussian martingales involving power integrands with an arbitrary positive exponent](#), 191
- 60G48** A.S. Sengar, N.S. Upadhye, [Subordinated compound Poisson processes of order  \$k\$](#) , 395
- 60G51** M. Hess, [A pure-jump mean-reverting short rate model](#), 113  
O. Ragulina, [Simple approximations for the ruin probability in the risk model with stochastic premiums and a constant dividend strategy](#), 245  
L. Vostrikova, [On distributions of exponential functionals of the processes with independent increments](#), 291  
A.S. Sengar, N.S. Upadhye, [Subordinated compound Poisson processes of order  \$k\$](#) , 395

- 60G55** N.D. Macheras, S.M. Tzaninis, [A characterization of equivalent martingale measures in a renewal risk model with applications to premium calculation principles](#), 43
- 60G57** I. Bodnarchuk, [Averaging principle for a stochastic cable equation](#), 449
- 60G60** Yu. Kozachenko, E. Orsingher, L. Sakhno, O. Vasylyk, [Estimates for distribution of suprema of solutions to higher-order partial differential equations with random initial conditions](#), 79
- 60G70** A.V. Marynych, I.K. Matsak, [The laws of iterated and triple logarithms for extreme values of regenerative processes](#), 61
- 60H05** H. Knani, M. Dozzi, [Linear backward stochastic differential equations with Gaussian Volterra processes](#), 415  
I. Bodnarchuk, [Averaging principle for a stochastic cable equation](#), 449
- 60H07** H. Knani, M. Dozzi, [Linear backward stochastic differential equations with Gaussian Volterra processes](#), 415
- 60H10** Olg. Borysenko, O. Borysenko, [Stochastic two-species mutualism model with jumps](#), 1  
M. Hess, [A pure-jump mean-reverting short rate model](#), 113  
H. Knani, M. Dozzi, [Linear backward stochastic differential equations with Gaussian Volterra processes](#), 415
- 60H15** D. Avetisian, K. Ralchenko, [Ergodic properties of the solution to a fractional stochastic heat equation, with an application to diffusion parameter estimation](#), 339  
I. Bodnarchuk, [Averaging principle for a stochastic cable equation](#), 449
- 60H20** M. Marzougue, Y. Sagna, [Irregular barrier reflected BDSDEs with general jumps under stochastic Lipschitz and linear growth conditions](#), 157
- 60H30** Olg. Borysenko, O. Borysenko, [Stochastic two-species mutualism model with jumps](#), 1  
M. Hess, [A pure-jump mean-reverting short rate model](#), 113  
M. Marzougue, Y. Sagna, [Irregular barrier reflected BDSDEs with general jumps under stochastic Lipschitz and linear growth conditions](#), 157
- 60J80** A. Tchobadjieff, P. Mayster, [Geometric branching reproduction Markov processes](#), 357
- 60K05** N.D. Macheras, S.M. Tzaninis, [A characterization of equivalent martingale measures in a renewal risk model with applications to premium calculation principles](#), 43
- 60K25** A.V. Marynych, I.K. Matsak, [The laws of iterated and triple logarithms for extreme values of regenerative processes](#), 61

- 62F10** D. Avetisian, K. Ralchenko, [Ergodic properties of the solution to a fractional stochastic heat equation, with an application to diffusion parameter estimation](#), 339
- 62G20** V. Miroshnichenko, R. Maiboroda, [Asymptotic normality of modified LS estimator for mixture of nonlinear regressions](#), 435
- 62H05** A. Basse-O'Connor, J. Pedersen, V. Rohde, [On infinite divisibility of a class of two-dimensional vectors in the second Wiener chaos](#), 267
- 62H10** A. Basse-O'Connor, J. Pedersen, V. Rohde, [On infinite divisibility of a class of two-dimensional vectors in the second Wiener chaos](#), 267
- 62H12** A. Kukush, I. Senko, [Prediction in polynomial errors-in-variables models](#), 203
- 62J02** A. Kukush, I. Senko, [Prediction in polynomial errors-in-variables models](#), 203
- 62J05** A. Kukush, I. Senko, [Prediction in polynomial errors-in-variables models](#), 203  
V. Miroshnichenko, R. Maiboroda, [Asymptotic normality of modified LS estimator for mixture of nonlinear regressions](#), 435
- 91B30** N.D. Macheras, S.M. Tzaninis, [A characterization of equivalent martingale measures in a renewal risk model with applications to premium calculation principles](#), 43  
M. Hess, [A pure-jump mean-reverting short rate model](#), 113  
D.J. Santana, L. Rincón, [Approximations of the ruin probability in a discrete time risk model](#), 221  
O. Ragulina, [Simple approximations for the ruin probability in the risk model with stochastic premiums and a constant dividend strategy](#), 245
- 91B70** M. Hess, [A pure-jump mean-reverting short rate model](#), 113
- 91E20** Y. Dolinsky, [On shortfall risk minimization for game options](#), 379
- 91G10** Y. Dolinsky, [On shortfall risk minimization for game options](#), 379
- 91G30** M. Hess, [A pure-jump mean-reverting short rate model](#), 113
- 91G80** L. Vostrikova, [On distributions of exponential functionals of the processes with independent increments](#), 291
- 91G99** D.J. Santana, L. Rincón, [Approximations of the ruin probability in a discrete time risk model](#), 221
- 92D25** Olg. Borysenko, O. Borysenko, [Stochastic two-species mutualism model with jumps](#), 1
