

Keywords index

Volume 8, 2021

- ℓ_p^n -balls – 239
- ℓ_p^n -spheres – 239
- φ -sub-Gaussian processes – 41

- asymptotic expansion – 435
- asymptotic geometric analysis – 239
- asymptotic normality – 93, 509
- asymptotic theory – 475
- asymptotically independent estimators – 373

- Bahadur Ranga Rao – 239
- Berry–Esséen bound – 329
- Berry–Essen bounds – 141
- bias reduction – 435
- blind source separation – 475
- bounded in the mean solution – 465

- CARMA processes – 309
- complete monotonicity – 309
- conditional maximum likelihood estimators – 435
- confidence interval – 509
- consistent estimators – 373
- convexity – 387
- covariance function – 93
- cylindrical random variable – 349

- difference equation – 465
- discrete distribution – 387
- distribution of supremum – 41

- eigenfunction – 141
- eigenspace – 141
- eigenvalue – 509
- entropy methods – 41
- existence, uniqueness, weak probabilistic solution – 115
- extinction – 17

- finite mixture model – 509
- fixed-point equation – 413
- fourth moment theorems – 141
- fractional process – 63
- functional Γ -calculus – 141

- Gaussian second-order moving average model – 435
- global solution – 17

- heat equation – 41
- high-dimensional convexity – 239

- intersection volume – 239

- joint asymptotic distribution – 291

- large deviation principles – 239
- large deviations – 63
- least squares estimator – 329
- Leslie–Gower and Holling-type II functional response – 17
- Lévy white noise – 179

- limit theorems – 141
- linear errors-in-variables model – 373
- linear operator – 349
- local mixing – 1
- long-range dependency – 475

- machine learning – 413
- Malliavin calculus – 141, 275
- Malliavin–Stein approach for normal approximations – 329
- Markov chain – 413
- Markov generator – 141
- Markov triple – 141
- metatime – 349
- mixture of the classical and Berkson errors – 373
- mixture with varying concentrations – 509
- moderate deviations – 63
- multiple integral – 141
- multiple Wiener–Itô integrals – 275
- multivariate analysis – 475

- nearest neighbor search – 413
- noncentral limit theorems – 475
- nonlinear regression model – 93
- nonnegative stationary processes – 309
- nonparametric estimation – 509
- nonpersistence in the mean – 17

- parameter estimation – 291
- Poisson space – 141
- precise large deviations – 239
- principal components – 509
- probabilistic analysis – 413
- probability metrics – 141
- proximity of solutions – 465

- random initial conditions – 41
- random measure – 349
- random tree – 413
- rate of growth – 41

- Rényi entropy – 387
- residual correlogram – 93
- Riemann zeta function – 275

- SDEs – 1
- Selberg theorem – 275
- sharp asymptotics – 239
- sharp large deviations – 239
- similarity search – 413
- spectrum – 141
- stationary Gaussian noise – 93
- stationary solution – 465
- Stein’s method – 141
- stochastic delay differential equations – 309
- stochastic modified-Leray-alpha model – 115
- stochastic partial differential equations – 179
- stochastic permanence – 17
- stochastic predator–prey model – 17
- stochastic ultimate boundedness – 17
- strong consistency – 291
- strong large deviations – 239
- sub-fractional Ornstein–Uhlenbeck process of second kind – 329
- subordinators – 309

- tempered stable subordinator – 63
- trawl process – 349

- vantage point tree – 413
- volume of convex bodies – 239
- vp-tree – 413

- weak convergence – 141
- weak persistence in the mean – 17
- weighted fractional Vasicek model – 291
- Wiener space – 141

- Young integral – 291
