

## 2010 Mathematics Subject Classification index

### Volume 8, 2021

- 1M06** C. Tudor, Chaos expansion of uniformly distributed random variables and application to number theory, 275
- 28C20** E. Azmoodeh, G. Peccati, X. Yang, Malliavin–Stein method: a survey of some recent developments, 141
- 34L10** E. Azmoodeh, G. Peccati, X. Yang, Malliavin–Stein method: a survey of some recent developments, 141
- 35G10** O. Hopkalo, L. Sakhno, Investigation of sample paths properties for some classes of  $\varphi$ -sub-Gaussian stochastic processes, 41
- 35J10** D. Berger, F. Mohamed, Second order elliptic partial differential equations driven by Lévy white noise, 179
- 35J15** D. Berger, F. Mohamed, Second order elliptic partial differential equations driven by Lévy white noise, 179
- 35R60** O. Hopkalo, L. Sakhno, Investigation of sample paths properties for some classes of  $\varphi$ -sub-Gaussian stochastic processes, 41  
R. Selmi, R. Nasfi, Existence and uniqueness of weak solution to a three-dimensional stochastic modified-Leray-alpha model of fluid turbulence, 115
- 37A25** A.Yu. Veretennikov, Note on local mixing techniques for stochastic differential equations, 1
- 39A10** M. Horodnii, V. Kravets, Bounded in the mean solutions of a second-order difference equation, 465
- 46B09** T. Kaufmann, Sharp asymptotics for  $q$ -norms of random vectors in high-dimensional  $\ell_p^n$ -balls, 239

- 46N30** F.E. Benth, I.C. Simonsen, [Metatimes, random measures and cylindrical random variables](#), 349
- 47A10** E. Azmoodeh, G. Peccati, X. Yang, [Malliavin–Stein method: a survey of some recent developments](#), 141
- 47D07** E. Azmoodeh, G. Peccati, X. Yang, [Malliavin–Stein method: a survey of some recent developments](#), 141
- 52A23** T. Kaufmann, [Sharp asymptotics for  \$q\$ -norms of random vectors in high-dimensional  \$\ell\_p^n\$ -balls](#), 239
- 60B10** E. Azmoodeh, G. Peccati, X. Yang, [Malliavin–Stein method: a survey of some recent developments](#), 141
- 60D05** T. Kaufmann, [Sharp asymptotics for  \$q\$ -norms of random vectors in high-dimensional  \$\ell\_p^n\$ -balls](#), 239
- 60E05** F. Buryak, Yu. Mishura, [Convexity and robustness of the Rényi entropy](#), 387
- 60F05** E. Azmoodeh, G. Peccati, X. Yang, [Malliavin–Stein method: a survey of some recent developments](#), 141  
 C. Tudor, [Chaos expansion of uniformly distributed random variables and application to number theory](#), 275  
 V. Bohun, [Probabilistic analysis of vantage point trees](#), 413  
 N. Lietzén, L. Viitasaari, P. Ilmonen, [Modeling temporally uncorrelated components of complex-valued stationary processes](#), 475
- 60F10** L. Beghin, C. Macci, B. Martinucci, [Random time-changes and asymptotic results for a class of continuous-time Markov chains on integers with alternating rates](#), 63  
 T. Kaufmann, [Sharp asymptotics for  \$q\$ -norms of random vectors in high-dimensional  \$\ell\_p^n\$ -balls](#), 239
- 60G10** M.S. Nielsen, V. Rohde, [On nonnegative solutions of SDDEs with an application to CARMA processes](#), 309  
 N. Lietzén, L. Viitasaari, P. Ilmonen, [Modeling temporally uncorrelated components of complex-valued stationary processes](#), 475
- 60G15** K. Es-Sebaiy, M. Al-Foraih, F. Alazemi, [Statistical inference for nonergodic weighted fractional Vasicek models](#), 291  
 N. Lietzén, L. Viitasaari, P. Ilmonen, [Modeling temporally uncorrelated components of complex-valued stationary processes](#), 475
- 60G17** M.S. Nielsen, V. Rohde, [On nonnegative solutions of SDDEs with an application to CARMA processes](#), 309
- 60G20** O. Hopkalo, L. Sakhno, [Investigation of sample paths properties for some classes of  \$\varphi\$ -sub-Gaussian stochastic processes](#), 41

- 60G22** L. Beghin, C. Macci, B. Martinucci, [Random time-changes and asymptotic results for a class of continuous-time Markov chains on integers with alternating rates](#), 63  
K. Es-Sebaiy, M. Al-Foraih, F. Alazemi, [Statistical inference for nonergodic weighted fractional Vasicek models](#), 291
- 60G52** L. Beghin, C. Macci, B. Martinucci, [Random time-changes and asymptotic results for a class of continuous-time Markov chains on integers with alternating rates](#), 63
- 60G57** F.E. Benth, I.C. Simonsen, [Metatimes, random measures and cylindrical random variables](#), 349
- 60G60** O. Hopkalo, L. Sakhno, [Investigation of sample paths properties for some classes of  \$\varphi\$ -sub-Gaussian stochastic processes](#), 41  
F.E. Benth, I.C. Simonsen, [Metatimes, random measures and cylindrical random variables](#), 349
- 60H05** C. Tudor, [Chaos expansion of uniformly distributed random variables and application to number theory](#), 275  
M.S. Nielsen, V. Rohde, [On nonnegative solutions of SDDEs with an application to CARMA processes](#), 309
- 60H07** E. Azmoodeh, G. Peccati, X. Yang, [Malliavin-Stein method: a survey of some recent developments](#), 141
- 60H10** A.Yu. Veretennikov, [Note on local mixing techniques for stochastic differential equations](#), 1  
M.S. Nielsen, V. Rohde, [On nonnegative solutions of SDDEs with an application to CARMA processes](#), 309
- 60H15** D. Berger, F. Mohamed, [Second order elliptic partial differential equations driven by Lévy white noise](#), 179
- 60H35** R. Selmi, R. Nasfi, [Existence and uniqueness of weak solution to a three-dimensional stochastic modified-Leray-alpha model of fluid turbulence](#), 115
- 60H40** D. Berger, F. Mohamed, [Second order elliptic partial differential equations driven by Lévy white noise](#), 179
- 60H99** M. Horodnii, V. Kravets, [Bounded in the mean solutions of a second-order difference equation](#), 465
- 60J05** V. Bohun, [Probabilistic analysis of vantage point trees](#), 413
- 60J20** V. Bohun, [Probabilistic analysis of vantage point trees](#), 413
- 60J27** L. Beghin, C. Macci, B. Martinucci, [Random time-changes and asymptotic results for a class of continuous-time Markov chains on integers with alternating rates](#), 63

- 62505** M. Yakovliev, A. Kukush, Estimation in a linear errors-in-variables model under a mixture of classical and Berkson errors, 373
- 62F12** A. Ivanov, K. Moskvychova, Asymptotic normality of the residual correlogram in the continuous-time nonlinear regression model, 93  
K. Es-Sebaiy, M. Al-Foraih, F. Alazemi, Statistical inference for nonergodic weighted fractional Vasicek models, 291
- 62G20** O. Sugakova, R. Maiboroda, Principal components analysis for mixtures with varying concentrations, 509
- 62H12** M. Yakovliev, A. Kukush, Estimation in a linear errors-in-variables model under a mixture of classical and Berkson errors, 373  
N. Lietzén, L. Viitasaari, P. Ilmonen, Modeling temporally uncorrelated components of complex-valued stationary processes, 475
- 62J02** A. Ivanov, K. Moskvychova, Asymptotic normality of the residual correlogram in the continuous-time nonlinear regression model, 93
- 62J05** O. Sugakova, R. Maiboroda, Principal components analysis for mixtures with varying concentrations, 509
- 62M09** K. Es-Sebaiy, M. Al-Foraih, F. Alazemi, Statistical inference for nonergodic weighted fractional Vasicek models, 291
- 62M10** A. Ivanov, K. Moskvychova, Asymptotic normality of the residual correlogram in the continuous-time nonlinear regression model, 93
- 62M15** F. Honda, T. Kurosawa, Bias reduction of a conditional maximum likelihood estimator for a Gaussian second-order moving average model, 435
- 62M86** K. Es-Sebaiy, M. Al-Foraih, F. Alazemi, Statistical inference for nonergodic weighted fractional Vasicek models, 291
- 68P05** V. Bohun, Probabilistic analysis of vantage point trees, 413
- 68W40** V. Bohun, Probabilistic analysis of vantage point trees, 413
- 76D03** R. Selmi, R. Nasfi, Existence and uniqueness of weak solution to a three-dimensional stochastic modified-Leray-alpha model of fluid turbulence, 115
- 76D05** R. Selmi, R. Nasfi, Existence and uniqueness of weak solution to a three-dimensional stochastic modified-Leray-alpha model of fluid turbulence, 115
- 94A08** N. Lietzén, L. Viitasaari, P. Ilmonen, Modeling temporally uncorrelated components of complex-valued stationary processes, 475
- 94A12** N. Lietzén, L. Viitasaari, P. Ilmonen, Modeling temporally uncorrelated components of complex-valued stationary processes, 475
- 94A17** F. Buryak, Yu. Mishura, Convexity and robustness of the Rényi entropy, 387
