

2010 Mathematics Subject Classification index

Volume 2, 2015

- 26A33** T. Shalaiko, G. Shevchenko, [Integral representation with respect to fractional Brownian motion under a log-Hölder assumption](#), 219
- 28A78** O. Slutskyi, [On packing dimension preservation by distribution functions of random variables with independent \$\tilde{Q}\$ -digits](#), 371
- 28A80** O. Slutskyi, [On packing dimension preservation by distribution functions of random variables with independent \$\tilde{Q}\$ -digits](#), 371
- 60E05** Yu. Mishura, Ye. Munchak, P. Slyusarchuk, [The rate of convergence to the normal law in terms of pseudomoments](#), 95
A.S. Praveena, S. Ravi, [Distance between exact and approximate distributions of partial maxima under power normalization](#), 391
- 60F05** Yu. Mishura, Ye. Munchak, P. Slyusarchuk, [The rate of convergence to the normal law in terms of pseudomoments](#), 95
- 60F10** M. Kleptsyna, A. Le Breton, B. Ycart, [Gärtner–Ellis condition for squared asymptotically stationary Gaussian processes](#), 267
- 60F17** Iu. Ganychenko, A. Kulik, [Weak approximation rates for integral functionals of Markov processes](#), 251
F. Sabzikar, [Tempered Hermite process](#), 327
- 60G12** I. Turchyn, [A multiplicative wavelet-based model for simulation of a random process](#), 309
- 60G14** M. Kleptsyna, A. Le Breton, B. Ycart, [Gärtner–Ellis condition for squared asymptotically stationary Gaussian processes](#), 267

- 60G15** E. Azmoodeh, T. Sottinen, L. Viitasaari, [Asymptotic normality of randomized periodogram for estimating quadratic variation in mixed Brownian–fractional Brownian model](#), 29
A. Yosef, [A group action on increasing sequences of set-indexed Brownian motions](#), 185
T. Sottinen, L. Viitasaari, [Fredholm representation of multiparameter Gaussian processes with applications to equivalence in law and series expansions](#), 287
- 60G20** F. Sabzikar, [Tempered Hermite process](#), 327
- 60G22** Yu. Mishura, I. Voronov, [Construction of maximum likelihood estimator in the mixed fractional–fractional Brownian motion model with double long-range dependence](#), 147
T. Shalaiko, G. Shevchenko, [Integral representation with respect to fractional Brownian motion under a log-Hölder assumption](#), 219
- 60G23** F. Sabzikar, [Tempered Hermite process](#), 327
- 60G40** G. Shevchenko, [Convergence of hitting times for jump-diffusion processes](#), 203
- 60G44** G. Shevchenko, [Convergence of hitting times for jump-diffusion processes](#), 203
- 60G48** A. Yosef, [A group action on increasing sequences of set-indexed Brownian motions](#), 185
- 60G50** I.M. Andriulytė, E. Bernackaitė, D. Kievinaitė, J. Šiaulyš, [A Lundberg-type inequality for an inhomogeneous renewal risk model](#), 173
A. Grigutis, A. Korvel, J. Šiaulyš, [Ruin probability in the three-seasonal discrete-time risk model](#), 421
- 60G60** A. Yosef, [A group action on increasing sequences of set-indexed Brownian motions](#), 185
T. Sottinen, L. Viitasaari, [Fredholm representation of multiparameter Gaussian processes with applications to equivalence in law and series expansions](#), 287
- 60G70** A. Ivanov, I. Matsak, S. Polotskiy, [Extreme residuals in regression model. Minimax approach](#), 297
A.S. Praveena, S. Ravi, [Distance between exact and approximate distributions of partial maxima under power normalization](#), 391
- 60H05** T. Shalaiko, G. Shevchenko, [Integral representation with respect to fractional Brownian motion under a log-Hölder assumption](#), 219
- 60H07** E. Azmoodeh, T. Sottinen, L. Viitasaari, [Asymptotic normality of randomized periodogram for estimating quadratic variation in mixed Brownian–fractional Brownian model](#), 29

- Iu. Ganychenko, Fast L_2 -approximation of integral-type functionals of Markov processes, 165
- Iu. Ganychenko, V. Knopova, A. Kulik, Accuracy of discrete approximation for integral functionals of Markov processes, 401
- 60H10** K. Ralchenko, Asymptotic normality of discretized maximum likelihood estimator for drift parameter in homogeneous diffusion model, 17
- G. Shevchenko, Convergence of hitting times for jump-diffusion processes, 203
- 60H35** Iu. Ganychenko, Fast L_2 -approximation of integral-type functionals of Markov processes, 165
- Iu. Ganychenko, V. Knopova, A. Kulik, Accuracy of discrete approximation for integral functionals of Markov processes, 401
- 60J35** V. Knopova, On the Feynman–Kac semigroup for some Markov processes, 107
- 60J45** V. Knopova, On the Feynman–Kac semigroup for some Markov processes, 107
- 60J55** V. Knopova, On the Feynman–Kac semigroup for some Markov processes, 107
- Iu. Ganychenko, A. Kulik, Weak approximation rates for integral functionals of Markov processes, 251
- 60J57** V. Knopova, On the Feynman–Kac semigroup for some Markov processes, 107
- 60J60** K. Ralchenko, Asymptotic normality of discretized maximum likelihood estimator for drift parameter in homogeneous diffusion model, 17
- 60J75** V. Knopova, On the Feynman–Kac semigroup for some Markov processes, 107
- 62F10** Yu. Mishura, I. Voronov, Construction of maximum likelihood estimator in the mixed fractional–fractional Brownian motion model with double long-range dependence, 147
