

## Subject index

### Volume 3, 2016

- asymptotic behavior of additive functionals – 191
- asymptotic normality – 47
- Bessel process – 223
- birth–death Markov chain – 315
- closure property – 79
- cointegrated sequences – 59
- conic section fitting – 19
- consistently varying tail – 165
- convolution closure – 165
- coupling – 315
- Cox–Ingersoll–Ross process – 1
- curve fitting – 19
- diffusion-type processes – 191
- discrete approximation – 181
- discrete approximation scheme – 1
- drift parameter estimation – 269
- expected maximum – 181
- exponential moment – 95
- exponential tail – 79
- exponential tightness – 145
- faithful Vitali coverings – 119
- Feret diameter – 325
- fractality – 209
- fractals – 119
- fractional Brownian motion – 181, 303
- fractionality – 209
- functional limit theorems – 1
- general stochastic measure – 133
- generalized solution – 237
- goodness-of-fit test – 287
- Hausdorff–Besicovitch dimension – 119, 213
- heat equation – 133
- heavy tail – 79, 165
- Hölder continuity – 237
- inhomogeneous distributions – 79, 165
- large deviations – 107
- large deviations principle – 95, 145
- least favorable spectral density – 59
- LePage series – 133, 237
- limit theorems – 223
- local alternatives – 287
- local time – 95
- Markov chain – 315
- maximum likelihood estimator – 107, 269

- mean square error – 59
- method of majorizing measures – 249
- minimax-robust estimate – 59
- minimax-robust spectral characteristic – 59
- mixed fractional Brownian motion – 107
- Monte Carlo simulations – 181
- multivariate errors-in-variables model – 47, 287
  
- N-self-similar sets – 213
- nonregular dependence on the parameter – 191
  
- $\mathcal{O}$ -exponential tail – 79
- Orlicz process – 249
- Orlicz space – 249
- Ornstein–Uhlenbeck process – 107, 249
  
- polygonal approximation – 325
- power of test – 287
  
- $Q^*$ -expansion – 119
- $Q_\infty$ -expansion – 213
  
- random closed set – 325
- random convolution – 79
- random convolution closure – 165
- random sum – 79
  
- random variables with independent GLS-symbols – 213
- randomly stopped sum – 165
- real harmonizable fractional stable process – 133
- renewal theory – 315
  
- singularly continuous probability measures – 119
- skew Bessel process – 223
- stable random measure – 133, 237
- stochastic differential equation – 269, 303
- stochastic partial differential equation – 237
- stochastic sequence with stationary increments – 59
- stochastic volatility – 269
- strong consistency – 269
- subspace clustering – 19
- supremum distribution – 249
  
- total least squares – 47
- total least squares estimator – 287
  
- wave equation – 237
- weak and strong solutions – 269
- workshop – 209
  
- zonotopes – 325
